

Dear Gavin & TMAC representatives,

We want to express our sincere gratitude to TMAC for sponsoring our team in the 2023-2024 NASA University Student Launch Initiative (USLI) competition. Your support in covering the material cost was crucial to our success, enabling us to design, build, and ultimately finish the competition. Your sponsorship played a vital role in our achievement, and we are immensely grateful for your contribution. Your belief in our team's potential and your commitment to supporting STEM education made a significant difference and we thank you for it.

We would also like to thank the administration for allowing us to utilize the Science & Technology center for our endeavors. We would not have been able to manufacture, test and design our vehicle without access to this space. I hope the following years will continue to allow the students to work diligently within the space.

As we reflect on our journey in the NASA USLI competition, we hope to continue our partnership with TMAC in the future. Your support has been instrumental in our success, and we hope to have the opportunity to collaborate with TMAC again next year. The group is now bigger than ever and could very much use TMACs support for the 2024 – 2025 year.

Thank you once again for your generosity, support, and belief in our team. We look forward to the possibility of continuing our partnership with TMAC and making a positive impact together in the future.

With sincere appreciation,

Isaiah Medina

LU USLI Team Lead
